

Emergency DOT Courier Pick-up Directions:

In order to meet the needs of our facilities that have COVID-19 samples requiring delivery to the WPHL, Saturday through Monday, the WPHL, WY-DOT and the Office of Homeland Security established an emergency courier route across Wyoming.

Please do NOT request sample delivery to WPHL via Highway Patrol, as they have other essential duties needing their attention. It is the goal of this emergency service to offer an alternative to expedite samples to our lab 7 days a week.

WY-DOT will be at hospital locations throughout the state at 15 minute, designated time intervals to pick up specimens from each of your communities. There will be only one site per community. The samples will be transported to the lab on the same day DOT picks them up.

DOT will NOT track your samples. They are only picking up the samples and getting them to the WPHL. It is imperative you track your own samples and have the correct paperwork with your samples.

HERE IS WHAT PICK-UP SITES TO KNOW:

- **There is only one pick-up site per community. Please share this information with the clinics and sites around your area and give them the opportunity to use your community's pickup site.**
- You cannot be late for your pick-up. DOT will wait the allotted 15 minutes and then continue on to their next site.
 - DOT needs a reliable contact name and number for someone to reach in case of extenuating circumstances that may delay their arrival.
 - You will use the hard-sided, orange topped containers to package your samples for DOT. (the same canisters used with the previous courier service) The WPHL Supply Order Form is located on the WPHL Website: <https://health.wyo.gov/publichealth/lab/>
 - Samples MUST be packaged in these containers. WY-DOT will NOT handle any specimens that are not in the hard sided containers.
 - **ONLY ONE SAMPLE PER BIOHAZARD SHIPPING BAG.** Ensure your samples are tightly capped and are accompanied with the required RED CAP requisition placed in the outer pocket of the bag. Samples will not be processed without the Red Cap requisition.
 - Multiple bagged samples per container is allowable as long as you can fit an cold pack into the shipment to maintain sample integrity.
 - **DO NOT USE DRY ICE**
 - DOT will NOT come into your facility. You must designate an external exact meeting place at your facility to meet them with your samples.
 - You will place your canisters containing samples into their cooler. It is important to remember DOT will not handle samples.
 - You cannot miss your 15 minute window, or you will have to hold your samples to ship the next day.
 - Anything collected after your pick up time on Monday will need to be shipped by FedEx Overnight.
 - FedEx shipments will resume Monday after your pick up time, through Thursday using FedEx labels and packaged as Category B.
 - Samples collected on Friday can be picked up by DOT on Saturday.
 - **COURIER SERVICES OFFERED SATURDAY THROUGH MONDAY**

SEE THE NEXT PAGE OF THIS DOCUMENT FOR A LIST OF COURIER PICK UP SITES AND MEETING TIMES.
